

## ***I.IEEE BASED ON CLOUD COMPUTING***

- 1. Permissive Cloud Storage Examine with Valid Outsourcing of Input Amend**
- 2. Cooperative Access Search with Selected Controller and Timing Facilitate Substitute Re-encryption task for E-health Clouds**
- 3. An Accessible Mechanism for Capability Distribution and Estimation in Cloud.**
- 4. Protected Expansion Computing Source in Cloud Computing: A Case Study of Unbroken Encoding**
- 5. A Structure for straightforward accessible Auctions in Cloud Computing with Varied Consumer Demands**
- 6. Confidentiality Conserving Organized Collective Key Search for Numerous Record Proprietor in Cloud Computing**

## ***II. IEEE BASED ON ARTIFICIAL INTELLIGENCE***

- 1. Tone of Voice control carrying out by words Recognition And Synthesizer (A Tone of Voice Integration)**
- 2. Resourceful Shared Geographical Keyword Uncertainty Handled on Road Networks**
- 3. Knowledge Adapted Models for Facial Appearance Examination and Motion Identification**

## ***III. IEEE BASED ON BIGDATA***

- 1. Increased PSO group exploration characteristic range for Data flow Mining Big Data**
- 2. A Structure-Based Access to service Big Data Analysis**
- 3. A Latest Pattern for Supply Trading Via a Model-Free Comment Organizer**

#### ***IV. IEEE BASED ON BIOMEDICAL & IMAGE MINING***

- 1. Blood Loss Edge and Area Discovery in the Wi-Fi Capsule Endoscopy Record**
- 2. Regular Distribution of MR Brain Descriptions with a Density Neural Arrangement**

#### ***V. IEEE BASED ON DATAMINING***

- 1. position sensitive Keyword uncertainty proposal Based on article adjacency**
- 2. comparison Class-by Operators for numerous structural Dependent Knowledge**
- 3. A flexibility methodical construction for huge portable statistics in heavily occupied region**

## ***VI. IEEE BASED ON IMAGE PROCESSING***

- 1. Automobile Authorization Identification Based on Extremal Regions and Controlled Boltzmann Technology.**
- 2. A Record for Evaluating No-Reference Video Excellence Evaluation Method**

## ***VII. IEEE BASED ON INFORMATION SECURITY***

- 1. Content Hiding in Descriptions Situated on QIM and OVSF**
- 2. Biometric Facilitate Certification Technology: An Assessment of Unwrap Position Real World Application**
- 3. A Biometric Statistics Expose Approach on a Survey of Flexible Biometrics**

## ***VIII. IEEE BASED ON MOBILE APPLICATION***

- 1. Increasing Apps for Optically Harmed Citizens: Instruction Educated from Practice**
- 2. A Mobility Diagnostic Construction for Giant Portable Records in Closely Occupied Area**

## *IX. IEEE BASED ON NETWORK SECURITY*

- 1. Reversible Records Hiding in Encoded Representation with Dispersed Basis Conceal**
- 2. Modeling and Authentication of Networked Shopping Industry Process by Consider Hateful Manners Pattern.**
- 3. Measuring the Manipulate of Superficial Computer-Generated Offense Risk on Online Check Prevention**
- 4. Flexible Steganalysis Situated on Enclosing Expectation of Pixels**

## *X. IEEE BASED ON NETWORKS*

- 1. Interruption Finding in 802.11 Networks: Experimental Estimation of Intimidation and a Open Dataset**
- 2. Two Segment Supportive Propagation Based on Batched Arrangement system**

## *XI. IEEE BASED ON SECURE TRASNMISSION*

- 1. Wi-Fi Information and Authority Transport for Multi-dispatch Assisted Supportive Statement**
- 2. Examine Choice for Architecture with QoS Interaction**

## *XII. IEEE BASED ON VISUAL CRYPTOGRAPHY*

1. **Toughness of Content Based Entirely Computerized Unrestricted Turing Analysis to Tell Computers and Humans away from each other**

### ***XIII. IEEE BASED ON WEB MINING***

1. **Label Based Picture Exploration by Common Re-ranking**
2. **A Grade Move Toward on Large level grid With Multidimensional Varied Information.**
3. **Client Check Evaluation Forecast by Exploring Public client Rating Performance**

# IEEE 2016 DOT NET PROJECTS
